

FEATURES & BENEFITS

HAMBLEDON ALUMINIUM WINDOWS
A-Rated Replacement For Traditional Steel Windows

FEATURE	BENEFIT
<ul style="list-style-type: none">Extruded 42mm Polyester Powder Coated Aluminium Construction	Provides strong, maintenance free and narrow sections
<ul style="list-style-type: none">32mm GRP Thermal Break	A recent innovation that increases thermal efficiency more effectively than standard resin breaks
<ul style="list-style-type: none">Slim Flat Sash & Working Pear Drop Hinges	These features work together to replicate a traditional steel window. Extended pear drop hinges are available to increase opening width in relation to fire escape.
<ul style="list-style-type: none">Welded Joints to Sash and Outer Frame	These provide ‘invisible’ joints that are a significant improvement over standard mitres
<ul style="list-style-type: none">Multipoint Espagnolette Locking Mechanism Operated by Traditional Handle & Matching Peg Stays	High security locking system increases security and increase thermal efficiency by reducing air leakage. There are a range of finishes available.
<ul style="list-style-type: none">Argon Gas Filled 24mm Double Glazed Units Utilising Low-Iron Glass & Soft Coat Low-emissivity Coatings	Exceptionally high specification glazing combines with GRP thermal break to provide an A-rating.
<ul style="list-style-type: none">Glazing by Security Tape, Silicon & External Secure Lock Beads	Further replicating traditional steel windows allowing replacement windows to match existing ones.
<ul style="list-style-type: none">A Range of Glazing Options Ranging From Face Fixed Bars with Overlay Joints to 12mm Antique Square Leads with Soldered Joints	Further increase security by preventing the sealed units being removed from the outside

The Hambledon Window
The modern alternative to steel windows
