EVOKE FLUSH

The aluminium system with the slimmest sightlines on the market

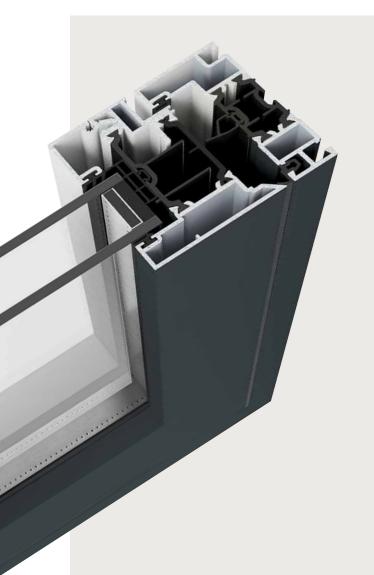

The Evoke flush range, it's designed for high performance and to be simple to install.

It provides solutions for the typical problems trade installers face with other aluminium systems.

No need for onsite scaffolding, it's quick to glaze and with the unique reverse butt joint option eliminating the need for dummy sashes or adaptors, you can maintain internal glazing with more affordable designs.

The system is 30% slimmer than its main competitors*, delivering the best sightlines for the bright, light look everyone wants. It can reach WERs of Band A++ and has aesthetics that are at home in both contemporary and traditional properties. It is secure, low maintenance and more sustainable.

Less frame, more light

Evoke's frames are 30% slimmer than those of the closest competitor. Based on an internally-glazed GGF standard window, with Evoke, there's an extra 12% glass area.

Cleaner lines and adaptable style

The Evoke flush range has clean lines and the option of a genuine fully-flush casement. It has a contemporary style that also works with more traditional architecture. With a 36mm cill that replicates timber, it's also ideal for conservation areas.

Swift installation

Flat rebates are easy to maintain and can save a couple of minutes per sash when fitting glazing packers. Evoke's frames also have a flat back that's easier to pack when you're on site.

Thermal performance

Strong aluminium sections allow large glazed areas, while advanced thermal break technology ensures no compromise on insulation. Evoke flush can reach a WER of Band A++ and U-values of 0.95W/m²K with triple glazing.

Reduced cost,

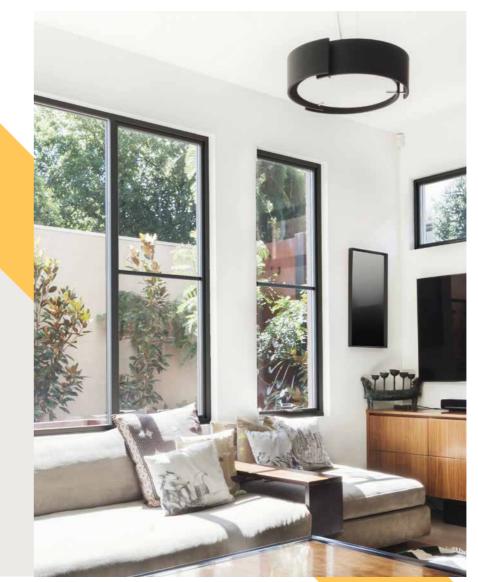

Evoke uses approximately 30% less aluminium than comparable systems. It's

therefore more affordable, more sustainable and less likely to generate waste.

More integration

Evoke is also compatible with PVC-U cills and trims.

Offers 12% more glass area

Market-leading slim sightlines - 30% slimmer sightlines than main competitors

Knock in bead with pre-inserted gasket which makes the system 20% quicker to install

Consistent glass lines: Profile designed to keep the glass aligned for casement and fixed lights

Innovative patent-pending reverse butt joint: fabrication without the need for dummy sashes or reverse adaptor profiles

Flush inside and out: choice of two sashes

Easy-clean rebates

Tailed gasket to **improve** thermal performance

FASTER INSTALLATION

Evoke uses knock-in beads. Without wedge gaskets, glazing is faster.

Flat, easy-clean rebates make glazing packers easy to fit.

Frames are flat backed, so easier to pack during installation.

Internal glazing as standard avoids the need for scaffolding.

Thresholds can be replaced without disturbing the doorframe.

THE EVOKE WINDOW RANGE

Everything you need is included in the Evoke window range.

The system is complete and has dedicated ancillary products so that whatever your customer is looking for, you've got the answer.

The layout of windows – the number of fixed and opening panes, the simplicity of the lines or the extra details that give character – everything is adaptable, and every component is designed to work together.

There are two types of casement: a standard flush design with a stepped shape internally, and a fully-flush option with flush lines inside and outside. Bay and bow windows are no problem – all the assemblies needed, all the trims and all the cills are included in the Evoke system. Where astragal bars are required, Evoke has them. If you want the advantages of a two-part cill, it's yours.

THE INNOVATIVE REVERSE BUTT JOINT

Most aluminium systems compromise and use dummy sashes, couplers or reverse rebate adaptors to ensure their windows can be internally glazed.

Unfortunately, this detracts from the appearance of windows and uses more resources.

The Reverse Butt Joint from Evoke flush range is unique. It's a patent-pending design which solves the problem, allowing internally glazed windows without the extra, chunky sashes. The window's wonderful slim lines are preserved, and more daylight can enter your home.

- > Improved appearance with simple, clean styling
- > Internal glazing without compromise
- > Uses less material, therefore, more planet friendly
- Lighter, brighter homes
- More affordable design

Evoke 70 flush casement window

Designed for a flush appearance to the exterior, finished frames have a neat step internally. The system allows for almost any arrangement of top or side-hung sashes and fixed lights, with the revolutionary reverse butt joint removing the need for adaptors and dummy sashes.

Dimensions

- > Side-hung sash max 721mm x 1321mm
- Top-hung sash max 1221mm x 1221mm
- Sightline (frame to vent) 61.5mm
- Sightline (vent to mullion) 79.5mm
- Sightline (fix light)36mm
- Glazing thickness:28-44mm

Performance

- WER up to Band A++ with triple glazing
- U-values as low as 0.95W/m²K
- Meets Building Regs without foams or special polyamides.

Aesthetics

- Market-leading slim sightlines
- Astragal bars
- Thicker cill to replicate timber
- Needs no dummy sashes
- Flush sash
- > Square look.

Installation

- > Flat back to frames
- Flat rebates for easy-fit glazing packers
- Knock-in beads.

- > 10-year mechanical performance guarantee
- 25-year surface paint finish guarantee
- Lifetime security guarantee on hardware.

Evoke 70 fully flush casement window

A true, interior and exterior, fully-flush design that makes the most of Evoke's ultra-slim styling. The advantage of the reverse butt joint allows frames of almost any layout to be made without the complexity or expense of dummy sashes or adaptors.

Dimensions

- Side-hung sash max 721mm x 1321mm
- Top-hung sash max 1221mm x 1221mm
- > Sightline: (frame to vent) 75mm
- Sightline: (vent to mullion) 93mm
- Sightline: (fix light)36mm
- > Sightline thinkness: 28mm 44mm.

- WER up to Band A++ with triple glazing
- U-values as low as 0.95W/m²K

Performance

- Meets Building Regs without foams or polyamides
- 40mm and 45mm polyamide thermal breaks to compensate for larger sightline.

Aesthetics

- True flush sash indoors and out (no stepped frame)
- Astragal bars
- Market-leading slim sightlines
- Thicker cill to replicate timber
- Needs no dummy sashes
- > Square look.

Installation

- > Flat back to frames
- > Flat rebates for easy-fit glazing packers
- Up to 44mm triple glazing
- Same bead as fixed light
- Knock-in beads.

- > 10-year mechanical performance guarantee
- > 25-year surface paint finish guarantee
- Lifetime security guarantee on hardware.

Evoke 70 flush tilt & turn window

A beautiful window for medium and high-rise buildings. The Evoke Flush Tilt & Turn Window has a strikingly slim sash that sits flush against its frame and has elegantly concealed gearing to give you a beautifully streamlined finish. It gives you a dramatic expanse of glass that maximises light and views to create a sophisticated space that's a joy to live in.

Dimensions

Available in larger sizes to create modern, light-filled living spaces:

- > 1342mm x 2442mm
- > 1642mm x 2042mm
- > Fixed light: 5m.

- U-values as low as 1.1 W/m²K
- Meets the

Performance

- WER rating of band B with double glazing and A with triple glazing
- latest Building Regulations without foams.

Aesthetics

- Market-leading slim sightlines
- Astragal bars
- Contemporary square aesthetics
- > Flush sash
- Concealed hardware enhances the sleek finish.

Installation

- Internal glazing
- Patented knock-in bead system fast fitting.

- > 10-year mechanical performance guarantee
- > 25-year surface paint finish guarantee
- Lifetime security guarantee on hardware.

THE EVOKE DOOR RANGE

It's easy to achieve consistency in style with Evoke – the flush door is possible with this advanced aluminium system.

Evoke has been developed to be reassuringly robust in an entrance door and graceful enough for a classic French door.

Evoke is versatile. Fanlights and sidelights can easily be incorporated in doorsets. There are purpose-made midrails, a full range of cills and thresholds and every element has been tested and proven to deliver excellent long-term performance. Domestic or commercial, whatever your market, with Evoke, there's a door that's easy to install and fits to perfection.

Evoke flush residential and french doors

Evoke is a highly configurable system, ideal for standard front and rear entrance doors or French doors. Side panels and fanlights can easily be incorporated into doorsets.

These doors also benefit from superior quality hardware. Selected for reliable performance, tested through cycle after cycle – locks, hinges, handles – every single element contributes to a secure, robust and very stylish system.

Dimensions

- Door leaf max 1000mm x 2400mm
- Glazing thickness 24mm - 40mm
- Sightline (Frame to Vent) 75mm.

Operation

- Open-in or open-out with either full-frame or low threshold
- Part M compliant low threshold.

Performance

- U-values as low as 1.2W/ m²K with triple glazing
- Meets Building Regs without foams or special polyamides.

Aesthetics

> Slim sightlines Flush

indoors

and out.

Installation

- Flat back to frames
 - > Flat rebates for easy-fit glazing packers
 - > Thresholds can be replaced with frame in situ
 - Knock-in beads.

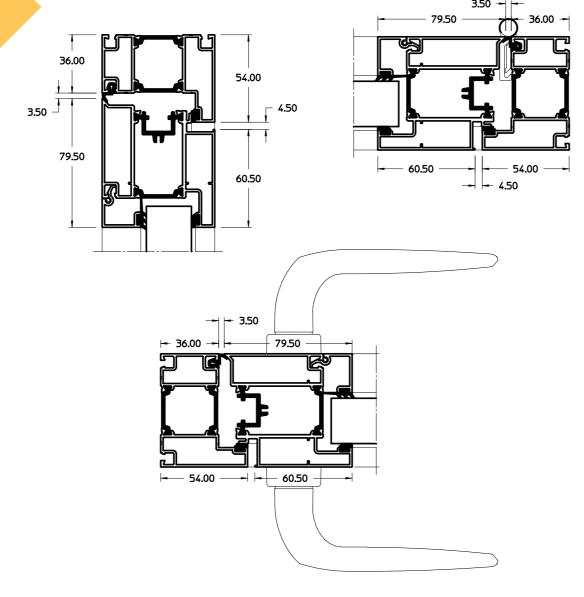

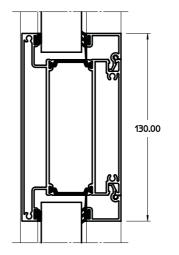

- > 10-year mechanical performance guarantee
- > 25-year surface paint finish guarantee
- Lifetime security guarantee on hardware.

Evoke **slimline bifold door**

Evoke Bifold door has all the strength a bifold needs and packs a real punch with its ultra-slim sashes and a contemporary square look.

Innovative thermal break technology means this beautiful door is also highly insulating. Super-tough polyester powder coating resists damage from scuffs and the day-to-day knocks. Add to that swift fabrication, easy installation and a wide range of options and this is a bifold door that can go anywhere.

- 1200mm (W). Max height 2500mm

window and door systems - common aesthetics.

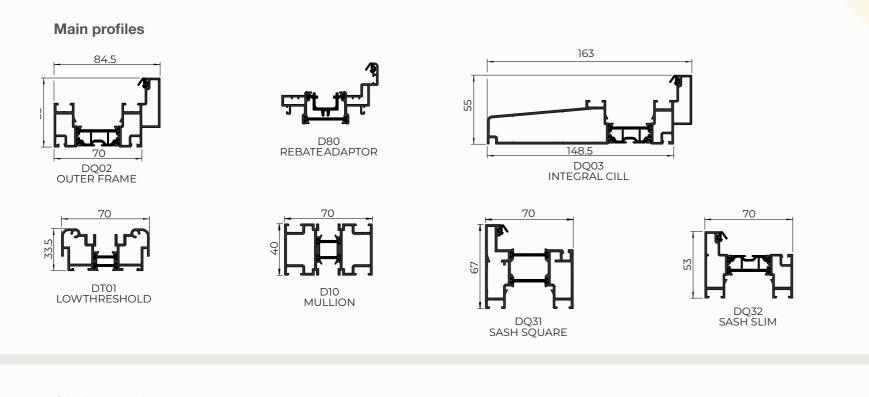

Installation

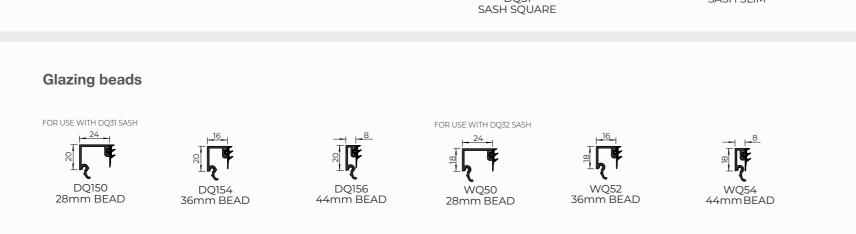

- > Easy to glaze
- Patented knock-in beads. 20 minutes per pane guicker to install.

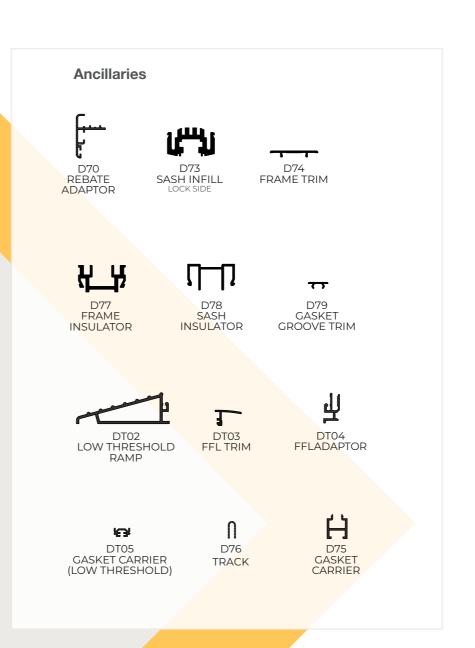

- > 10-year mechanical performance guarantee
- > 25-year surface finish guarantee
- Lifetime security guarantee on Yale hardware.

Aluminium slimline bifold door main components

Evoke flush handles

We have selected products known for their reliability, ease of use and durability, and every item in the range has undergone rigorous testing. The range includes styles and finishes to suit all projects.

Casement window

Evoke's Flush and Fully Flush windows utilise high-quality hardware throughout. Friction stays are robust and reliable. Espags have been selected for ease of fitting, PAS24 compliance and corrosion resistance. Handles are proven, stylish and benefit from key locking and easy operation. Hinge protectors and cavity locking blocks are simple to adjust and easy to work with. For extra piece of mind all PAS24 compliant casement windows come with Yale's Lifetime Security Guarantee.

Flush door

Security, weather protection and ease of use were paramount in the selection of hardware for both Evoke's flush residential door and the French doors, but style hasn't been forgotten – handles suite perfectly with window handles and letterplates have clean modern styling and an immaculate finish. Doors fitted with the Yale 3-star cylinder and conforming to PAS24 carry the Yale Lifetime Security Guarantee. All door hardware is easy to fit, quick to adjust and proven for long-term

Evoke flush **finishes**

Colour can make a huge difference to the overall success of a glazing project, and in architectural terms, it can be a fundamental part of the whole project. That's why Evoke's colour palette isn't limited.

Different eras and building materials demand different finishes, sometimes subtle, sometimes bold. We can supply profiles finished with any gloss level, in any RAL colour, or any dual colour combinations. There really is no limit to the colours you can choose, enabling you to satisfy more customers and fulfil the aesthetic requirements of more construction projects.

All Evoke's aluminium sections are finished with a tough, durable polyester powder coat, certified to the Qualicoat standard, which surpasses European requirements. In addition, we can supply special marinegrade finishes for more challenging environments.

All above colours are Evoke standard stock and non stock finishes. All other RAL colours or any dual colour combinations, gloss levels are available on request.
